PROFESSIONAL SUMMARY

Adaptable and solutions-focused Information Systems and Technology specialist with practical skills in web development, database management, and technical IT support. Experienced in building responsive websites, writing clean backend logic, maintaining databases (MySQL, MSSQL, MongoDB), and troubleshooting software and operating system issues. Committed to delivering reliable technical support, clear documentation, and efficient digital solutions.

PROFESSIONAL EXPERIENCE

2024 – Present

FLiKBi MEDIA / Freelance

Freelance Web Developer & IT Support Specialist

- Develop, customize, and maintain responsive websites and web interfaces using modern HTML, CSS, JavaScript, and PHP.
- Provide Tier 1/Tier 2 technical troubleshooting for client systems, resolving operating system errors, software misconfigurations, and network connectivity issues.
- Manage and query relational and document databases to ensure data consistency and integrity.
- Design user interfaces, digital flyers, and visual branding assets for small businesses.
- Communicate technical concepts clearly to non-technical users and document step-by-step resolution guides.

2024 – Present

University of Mines and Technology (UMaT)

Technical & IT Assistant (Academic & Community)

- Assist peers and local users with software installations, system configurations, and diagnostic utility runs.
- Collaborate on team coding and systems analysis tasks following standard software development life cycle (SDLC) processes.
- Participate in local technical workshops and developer sessions with Google Developer Groups (GDG) on Campus.
